

Mini Project

Problem Statement

Build a complete pipeline that reads a CSV file from Blob Storage and processes it using Azure Data Factory.

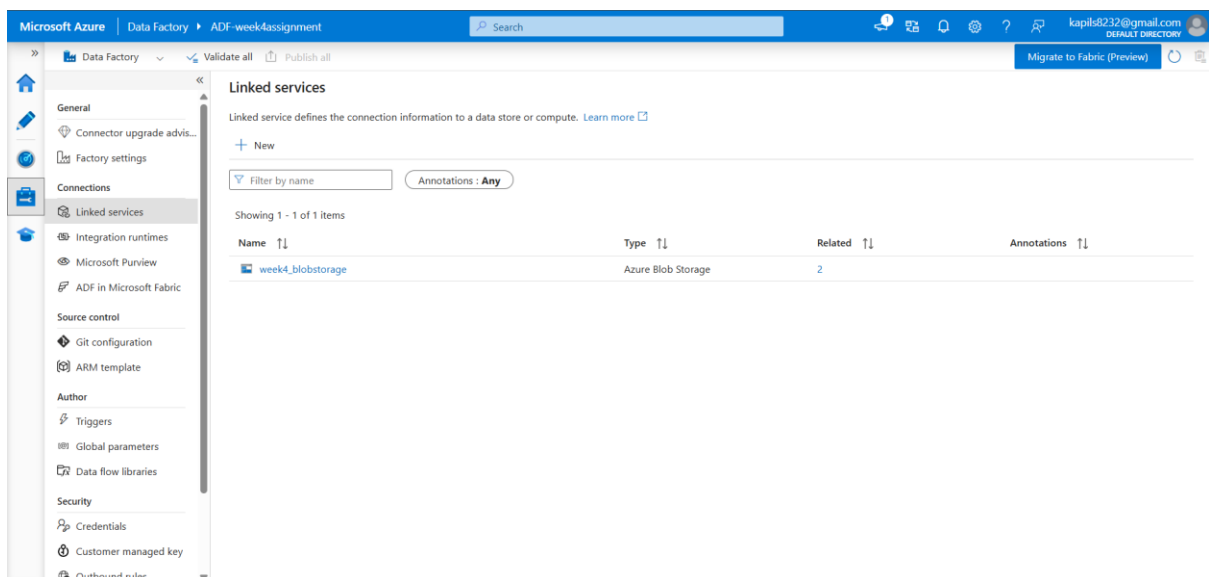

Step 1: Resource Creation

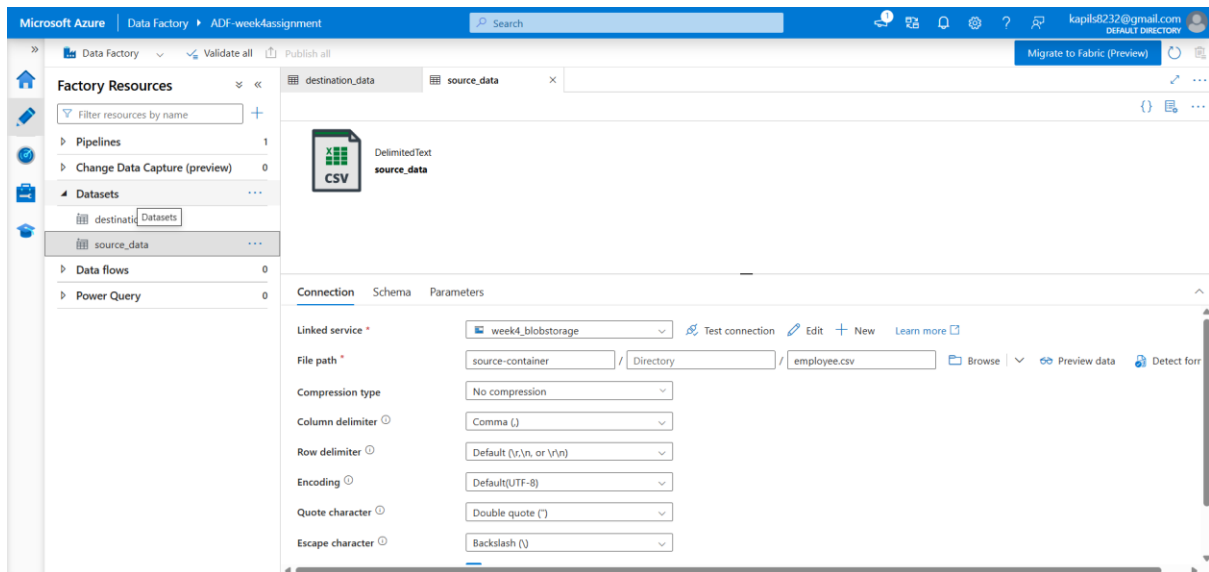

I used the same source container (source_container) which having the csv file (employee.csv) in the same blob storage (storageweek4assignment).

Step 2: Linked Service + Dataset creation

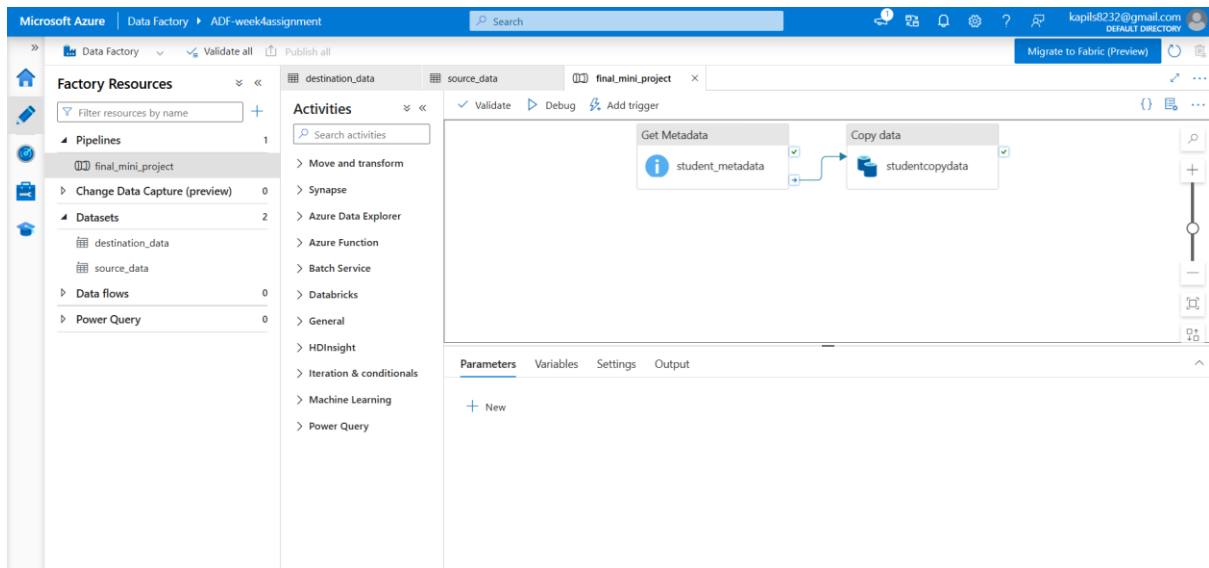

I used the existing Linked Service (week4_blobstorage) connecting ADF to the storage account, along with the source dataset (DS_Source) and destination dataset (DelimitedText1) pointing to the destination container.

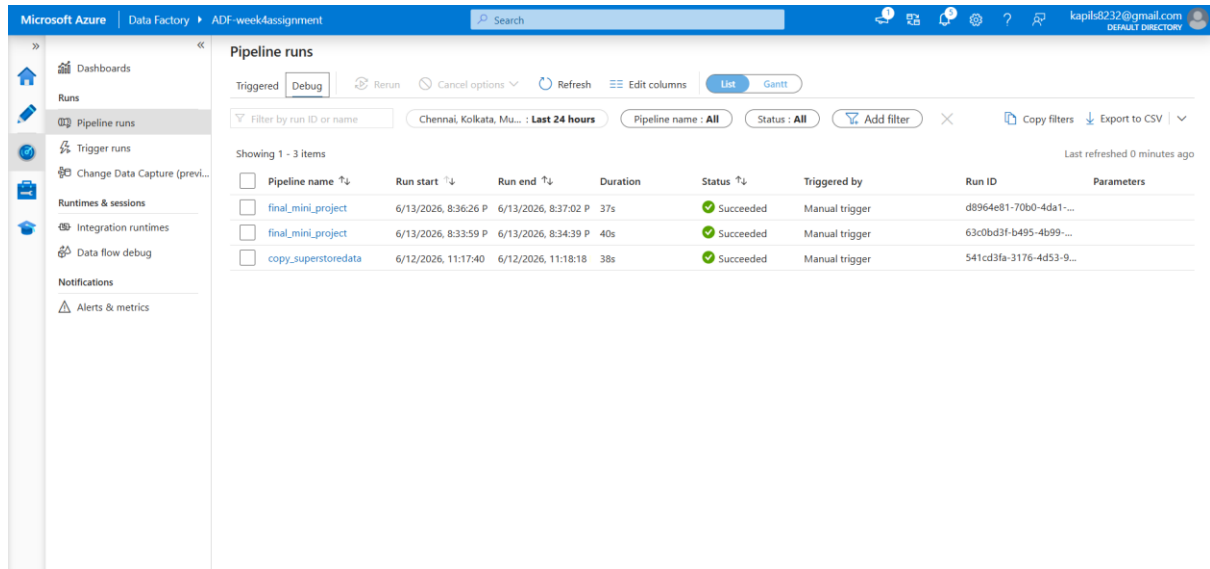

Step 3: Pipeline with Metadata + Copy Data

I built the pipeline (final_mini_project) with a Get Metadata , to confirm the file exists and check its properties, and Copy Data activity that transfers the file to the destination container.

Step 4: Pipeline Execution

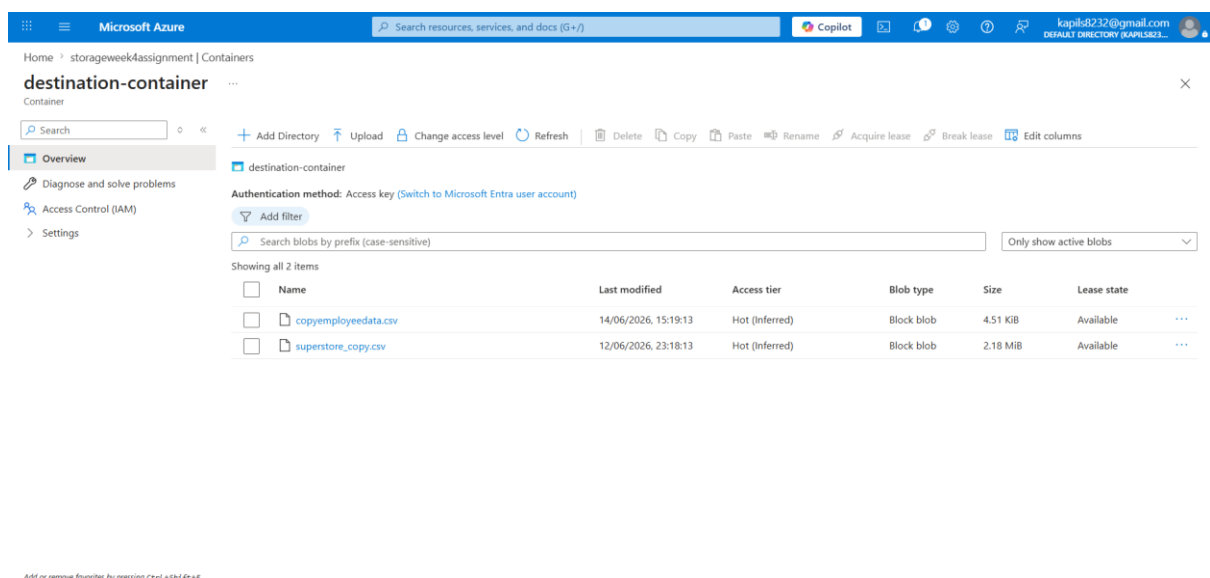

I run the pipeline in Debug mode. Both the Get Metadata and Copy Data activities succeeded.

Pipeline name	Run start	Run end	Duration	Status	Triggered by	Run ID	Parameters
final_mini_project	6/13/2026, 8:36:26 P	6/13/2026, 8:37:02 P	37s	Succeeded	Manual trigger	d8964e81-70b0-4da1-...	
final_mini_project	6/13/2026, 8:33:59 P	6/13/2026, 8:34:39 P	40s	Succeeded	Manual trigger	63c0bd3f-b495-4b99-...	
copy_superstoredata	6/12/2026, 11:17:40	6/12/2026, 11:18:18	38s	Succeeded	Manual trigger	541cd3fa-3176-4d53-9...	

Step 5: Output Validation

I checked the destination container and confirmed the file (copyemployeedata.csv) was successfully copied.

Name	Last modified	Access tier	Blob type	Size	Lease state
copyemployeedata.csv	14/06/2026, 15:19:13	Hot (Inferred)	Block blob	4.51 KiB	Available
superstore_copy.csv	12/06/2026, 23:18:13	Hot (Inferred)	Block blob	2.18 MiB	Available

Summary

This mini project required building a pipeline to read a CSV file from Blob Storage and process it using Azure Data Factory. I used a Get Metadata activity to validate the source file before copying it, then used a Copy Data activity to move it to a new destination container. The pipeline run successfully in Debug mode, and I confirmed the file was copied correctly by checking the destination container.
